

**THE SPECIES OF APHIDIDAE FAMILY INJURING
ROSACEOUS FRUIT TREES IN IRAN¹**

A. REZWANI & GH. RADJABI²

SUMMARY

Twenty two species have been found injurious to rosaceous fruit trees including six reported for the first time in Iran. These newly found aphids are :

Anuraphis farfarae (Koch.)

Brachycaudus (*Appelia*) *prunicola* (Kalt.)

Brachycaudus sp.

Dysaphis devecta (Walk.)

Dysaphis sp

Roepkea marchali (Borner)

Despite close search, some of them remain still with unknown secondary host plants, whereas in the others the host plants have been relatively well identified
