POPULATION FLUCTUATION OF Tetranychus (Tetranychus)  
turkestani (Ugarov and Nikolski) IN ESFAHAN (1)

H. FATEMI (2)

SUMMARY

Studies on the population fluctuation of T. turkestani were carried out in three different places of ESFAHAN region during the years 1977 and 1980 on apple trees.

The Figures in Farsi text, represented in both Farsi and English languages, give the data on this question.
