

STUDY OF DIFFERENT SPECIES OF «LOTUS» IN IRAN

M. MOUSSAVI (1)

Plant Pests & Diseases Research Institute, Tehran, Evin

Summary

This paper is based on the study of different species of «Lotus» distributed throughout Iran. For this survey, the reports of Mrs. Anna Chrtkova Zertova "The Variability of Critical Species of *Lotus* L. in Iran and in the Neighbouring Countries" were extensively used. The species studied in this paper have been identified by: Mrs. Anna Chrtkova Zertova, Dr. Esfandiari, Eng. Iranshahr and the author. The list of species of this genus will be published in a complete list of specimens in the Evin Herbarium in the near future.
